Loft 1 | Noordhoek Farm Village | Main Road | Noordhoek

Vermicomposting is a safe, hygienic and odourless way of processing organic kitchen waste, newspaper and cardboard. Vermicomposting can be done either on-site or at a separate location, and the end products can be used for local benefit. The beneficial organisms and the liquid and solid fertilisers that are produced by vermicomposting improve soil conditions and the health of soil and plants.

In April 2006 FullCycle set up a worm farm at the Mount Nelson Hotel. Three and a half years later it is still going strong. The earthworms are multiplying and the vermicompost and vermitea are being used in their beautiful gardens.
